

Business Intelligence & Analytics

nataavi

A MULTIDISCIPLINARY CONSULTING
& INVESTMENTS FIRM

Business Intelligence

We at NATAVI continuously innovate and evolve our service offerings and capabilities to meet current and future market needs in data warehousing and business intelligence. We bring BI and Data warehousing service offerings to our customers that are relevant from their business perspective.

As business intelligence project requirements grow more complex and specific and deadlines grow tighter, it is often desirable to get expert BI consultation for speedy, efficient, and high quality BI product implementation and maintenance.

Natavi services include comprehensive Business Intelligence (BI), Data Warehousing (DW) and Big Data solutions. We provide both on-site and in-house business intelligence consulting services. Our services encompass every aspect of the product development cycle, right from design, development, deployment, troubleshooting to hosting.

Focus

Architecture and Design

Natavi's BI architecture solution allocates organizations real-time access and complete control of their data, helping them make changes at ease. This is cost effective due to reduced (Extract, Transform, Load) ETL licensing fees, design, and development expenses. After implementation, the BI solution will be self-sufficient without any dependency on IT.

**The essence of strategy is choosing
what not to do.**

-Prof. Michael Porter

Focus

Dashboard and Reporting

Our dashboard and reporting development expertise can provide you with speedy, robust, and optimized solutions to all of your, dashboard, reporting and BI needs.

- Custom Report Development
- Data Modeling and Query Access
- Multidimensional Cube Design
- Viewsheet Design Development
- Dashboard Design Development

Focus

Analytics

We help our customers understand the advantages of their BI solutions by working with them through the change management process in the deployment phase. Our specific solutions help customers benefit from advanced data analytics.

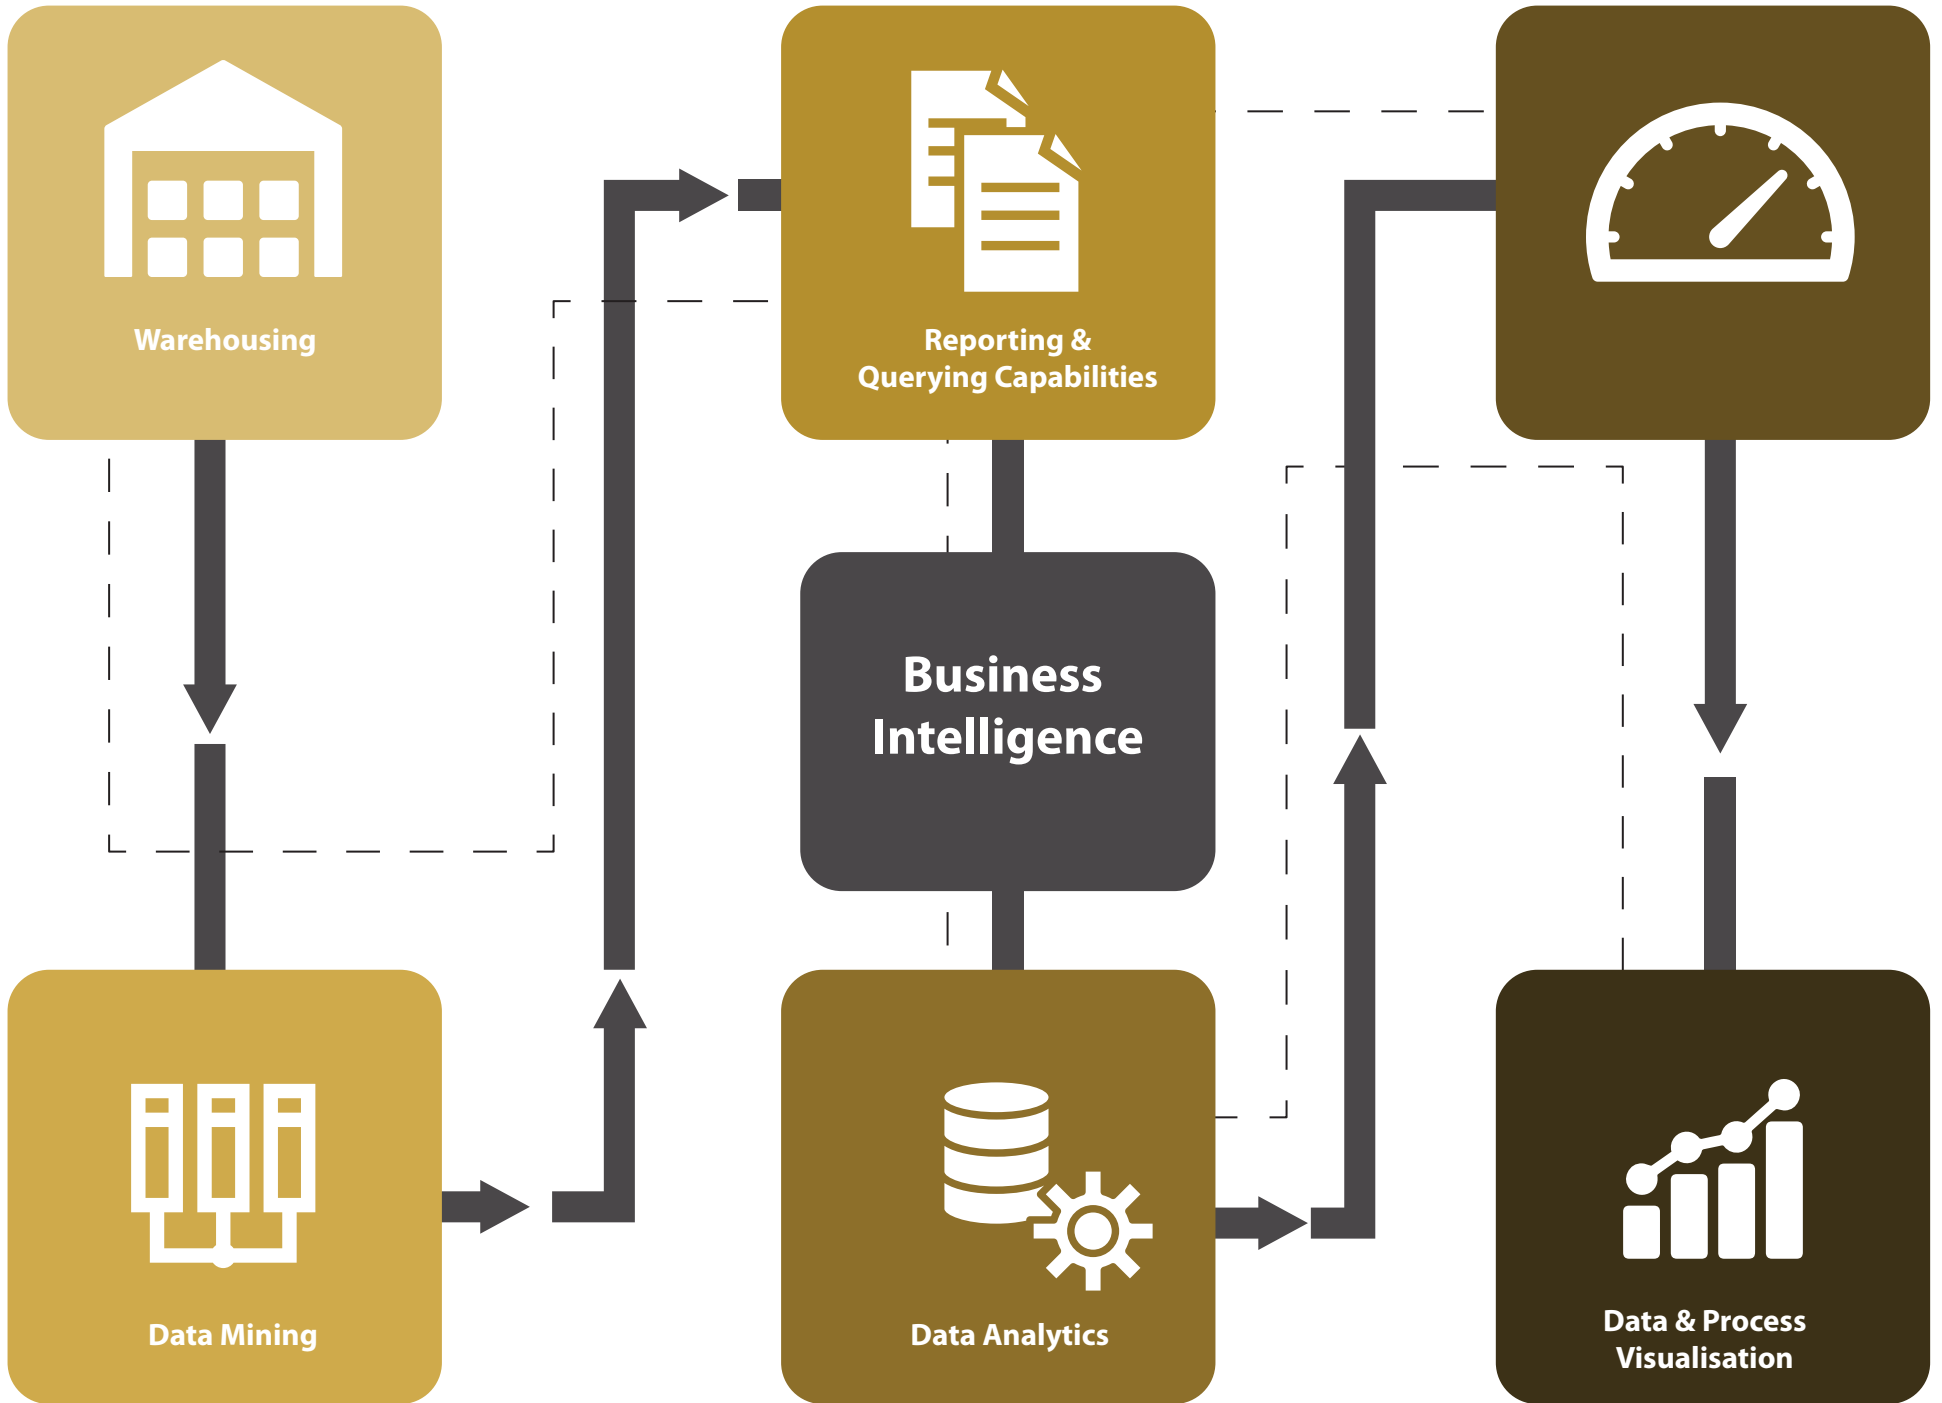

The goal is to turn data into information,
and information into insight.

-Carly Fiorina
